

How to become a Maths Ambassador...

You **must** complete stage 1 and then stage 2

Reception STAGE 1

You need to be able to:

Count to 20

Write numbers to 10

and...choose 3 activities from the list below:

Create a maths poster for the STEM display board

Make a maths number story for your class to solve

Tell Miss Bain a maths joke!

Create a game using your maths skills

Play a board game at home that uses your counting skills...

Take a photo of you playing it or find another way to show that you have played a game. Good Luck!

Share your completed activities with your teacher and class. Your teacher will then let Miss Bain know and she will meet with you to have a chat and to give you a Golden ticket.

Reception STAGE 2

You need to be able to:

Count to 50

Know your number bonds to 10

and...choose 4 activities from the list below:

Create a maths hunt in your local area or around your house that others will be able to follow

Make a picture out of 2D shapes and be able to name them

Make a list of at least 10 ways that you use maths in your everyday life – take photos

Create a video of your own maths pattern

Create your own maths game, don't forget to include the rules!

Interview some of your friends /family and find out their views on maths – are they the same as yours?

Share your completed activities with your teacher and class. Your teacher will then let Miss Bain know and she will meet with you to have a chat and to give you your certificate and maths ambassador badge.

Congratulations!
