| Target | Know decimal, fraction and percentage equivalence |
| :--- | :--- |
| Detail | This target is about knowing the equivalence between a decimal, fraction and percentage, e.g. |
|  | $0.75=3 / 4=75 \%$ |

Maths Rapid Recall: Step 7

| Target | Square numbers to $\mathbf{1 2}$ |
| :--- | :--- |
| Detail | This target is about knowing all the square numbers and recognising the symbol for a square <br> number, e.g. <br>  <br>  <br>  <br> 4 squared is 16 <br> $4^{2}=16$ |

## Maths Rapid Recall: Step 7

| Target | Square numbers of multiples of $\mathbf{1 0}$ up to $\mathbf{1 0 0}^{\mathbf{2}}$ |
| :--- | :--- |
| Detail | This target is about using what is known about square numbers to recall square numbers of <br> multiples of 10, e.g. <br> If $4^{2}$ is 16 then $40^{2}$ is 1600 |

| Maths Rapid Recall: Step $\mathbf{7}$ |  |
| :--- | :--- |
| Target | Doubles and halves of all multiples of $\mathbf{1 0}$ to $\mathbf{1 0 , 0 0 0}$ |
| Detail | This target is about being able to double and halve any number between 10 and 10,000 that <br> ends in zero, e.g. |
|  | Double 4,340 is 8,680 <br> Half of 6,250 is 3,125 |
